CHICAGO TANK LINING

SINCE 1959

**PROTECTIVE COATING &
LINING PROFESSIONALS**

WHEN THE JOB NEEDS
TO BE DONE RIGHT
THE FIRST TIME

www.chicagotanklining.com

**YOU HAVE A
PROBLEM**

**WE HAVE
THE SOLUTION**

DECADES OF
EXPERIENCE ALLOWS
CTL TO FIND THE
BEST COATING,
LINING OR DROP-IN
LINER FOR
YOUR SPECIFIC
ENVIRONMENT

Whether it's a corroding or leaking tank, swimming pool, pond, fountain, aquatic feature, underground storage tank or anything that contains liquid, we'll have more than 50 years of experience in finding the highest quality, longest lasting solutions.

Our specialty is researching the marketplace to find the product or system that will last the longest in your environment.

The longer our coatings systems last, the less expensive they actually are in terms of maintenance, downtime, and beautification.

We do the job right the first time
— Since 1959

For assistance and consultation on selecting the best lining system for your specific corrosion problem, please contact us.

**CTL:
WE DO MORE
THAN YOU THINK**

THE CHICAGO TANK LINING DIFFERENCE

AFFORDABILITY

Our options are the most cost effective over the long run. Here's why:

- Minimum downtime.
- Long service life with little or no maintenance.
- Less expensive than replacement.
- Reduced risk of leakage and environmental clean-up.
- Avoid losing short-term savings when inferior materials or poor quality installations fail or installers are no longer in business to honor their warranties. CTL's solution is a long-term approach.

RELIABILITY

We research coatings, drop-in liners and dozens of other corrosion protection technologies prior to recommending them to you. Every solution includes:

- Proven history of performance success in identical or similar applications.
- Manufacturers that are willing to stand by their materials.
- Technical staff that understands the scope of each project and its requirements.
- Suitability to the installation. Use of FDA, USDA, EPA, NSF, UL or other approved standards where required.

VERSATILITY

Our expertise allows us to work in large, industrial settings, from lining million-gallon storage tanks for Amtrak to delicate commercial linings like grease traps at the Chicago Pizza Kitchen or the otter tanks at the Shedd Aquarium. Whether it's a tank, swimming pool, floor or any other type of application, each CTL job is custom-designed to your needs.

There's no better solution than using one of Chicago Tank Lining systems to solve your corrosion and leakage problems.

PROTECT SOONER NOT LATER!

Whatever the project, we research the options and offer you the best alternatives available. Our coating systems, drop-in liners, consulting and engineering services are second to none.

Since 1959 Chicago Tank Lining has been a respected pioneer in the field of corrosion protection. No other company gives you the quality, service and benefits that we provide.

QUALITY INSTALLATIONS

Our top priority is a commitment to high quality installations. Each job is supervised by a highly trained foreman working with extremely experienced, conscientious, and safety-minded crews. Anything less than your 100% satisfaction is unacceptable.

SERVICE AND SUPPORT YOU CAN COUNT ON

Whether you need a quote, advice, or have an unusual problem, CTL responds promptly and professionally.

Following completion of a project, we respond quickly to provide remedies if a problem occurs.

THE BEST GUARANTEE

We provide the longest and strongest guarantees in the industry. Many of our installations come with our unique, 10-year, non-prorated guarantee. Because of our extraordinary attention to quality and detail, our guarantee is typically double that of our competitors.

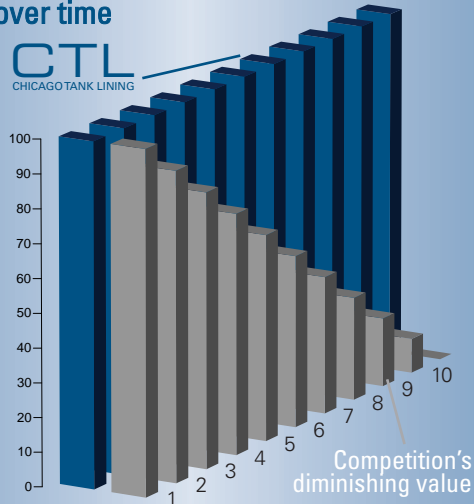

OUR UNIQUE NON-PRORATED GUARANTEE KEEPS YOU 100% COVERED

Other tank lining companies, contractors and new tank installers offer diminishing warranties. Over time, the value of their warranty is reduced.

The Chicago Tank Lining Guarantee retains its full value throughout its life.

With their warranties, if you need a repair after several years you pay for a portion of the repair based on length-of-service already used. With our guarantee, should our coatings require repair, there is no repair charge.

Comparison of warranties over time

We can afford to offer this unique, powerful guarantee because of our confidence in our experience, unparalleled quality of workmanship and use of superior materials.

When you compare CTL to our competitors, please consider the added value, total satisfaction and long-term savings only Chicago Tank Lining can provide.
