

# Decades of success in industrial and commercial applications:

Decades of research, development and quality assurance have led to the formulation of high-performance corrosion and abrasion protection systems. We thoroughly research each project to find the best coating, lining or drop-in liner for that specific environment.

Chicago Tank Lining specializes in the installation of these various high-quality coatings or liners to solve your corrosion, abrasion, leakage and spillage problems.

Chicago Tank Lining is one of the oldest coating applicators in the Midwest. No other company matches our quality of installation and product choice.

**Tanks (all types)**  
**Concrete basins**  
**Floors**  
**Sumps**  
**Swimming Pools and Spas**  
**Grease Traps**  
**Cooling Towers**  
**USTs**  
**ASTs**  
**Secondary Containment**  
**Drop-in liners for:**  
**Wood tanks**  
**Concrete tanks**  
**Steel tanks**  
**Temporary Tanks**

*For more information or for technical assistance*

<b>INDUSTRIAL</b>	<b>APPLICATIONS</b>
Petroleum	Underground storage tanks (meets EPA upgrade regs to pass 1998). Storage and process tanks. Steel bottoms in bulk tanks.
Petrochemical	Storage and process tanks. Steel bottoms in bulk tanks.
Containment Basins	Secondary containment and floors.
Chemical Processing	Chemical tanks of all types.
Bulk Storage	Tank bottoms, process areas, floors and sumps. Pollution control scrubbers, absorbers and ducts.
Water & Wastewater Treatment	Hot and cold water tanks (NSF approved coatings). Aeration, clarification and neutralizing basins. Waste and wastewater treatment basins and tanks. Condensate return, deaerator and makeup tanks.
Food and Beverage Processing	Tanks containing liquid and solid food products (NSF approved coatings available). Floors.
Power Generation	All types of tanks. Stack liners.
Agricultural & Agri-Chemical	Spill and splash areas. Tank trucks and rail cars.
<b>COMMERCIAL</b>	<b>APPLICATIONS</b>
Water Systems	Hot and cold water tanks (NSF approved coatings). Floors. Cooling Towers. Condensate returns, deaerator and makeup tanks.
Underground Storage Tanks	Lining meets EPA upgrade regs to pass 1998. Abandon in place (where allowed).
Recreation	Swimming pools, spas, floors and
